EDUCATION

Ballari Institute of Technology and Management

2025 – 2029

B.E. in Computer Science and Engineering (Data Science)

CGPA: 7.75

TECHNICAL SKILLS

Programming Languages: C, C++, Python

Web Technologies: HTML

Office & Productivity Tools: MS Office, Turbo C, VS Code

PROJECTS

AI Mental Companion for Students

- Developed a student-focused AI-based concept designed to support students dealing with academic pressure and everyday challenges.
- Focused on providing accessible conversational support and useful coping resources.
- Explored the role of AI, psychology, ethics, privacy, and responsible technology in student well-being.

Blood Bank Management System

- Developed a Python-based console application for managing blood donor records.
- Implemented features for adding donor information, displaying donor records, and searching donors by blood group.
- Used Python data structures, functions, conditional statements, and loops to implement the system.

Travel Budget Splitter

- Developed a C-based application for managing and splitting travel expenses among multiple travelers.
- Used structures, arrays, functions, and menu-driven programming.
- Includes expense recording, viewing expenses, and calculating the expense split among travelers.
